

30-TONNE WORKSHOP PRESS

Introducing the Auto Pro-Up PS-2000 30-Tonne Workshop Multi Press.

The PS-2000 has been designed and manufactured in Korea specifically for the needs and requirements of the automotive repairer. With a 30-tonne rating operated by a conveniently located foot pedal, the *Air Over Hydraulic Pump*, the PS-2000 performs all the needs faced on a

daily basis whether you are repairing powertrains, driveline components, suspension, wheel bearings or general tooling.

Being designed for the automotive repairer has its added benefits in being a single compact unit that is highly versatile and particularly suited to workshops

where minimal space is available.

The PS-2000 comes with a list of features as standard.

HYDRAULIC POWER PACK

Press any bearing or bush with precision and accuracy in minutes, saving valuable workshop time. The smooth operation of the *Air Over Hydraulic Pump* foot pedal provides hands-free accuracy and control. Even the most difficult pressing tasks become safe and easy.

STRUT SPRING COMPRESSOR

The built-in Strut Spring Compressor makes removing and installing suspension springs a breeze. All the mounting adaptors for the base of the strut are simple to lock in with no tools required and the spring mounting hooks adjust in seconds with a safety cage as standard. Not only does the PS-2000 Strut Spring Compressor overcome the Occupational Health & Safety concerns of your employees, but it dramatically reduces the time required which helps increase shop profits.

FRONT WHEEL DRIVE HUB SEPARATOR

The PS-2000 has solved the dangerous issue of attempting to stabilise a wheel bearing hub assembly when there are no flat surfaces available. Simply suspend the hub in the hub mounts and press the bearings in and out without fuss.

COMPREHENSIVE 29-PIECE ACCESSORY KIT

The 29-piece adaptor, bearing separator, die and spacer kit comes standard with the PS-2000 ensuring safe work practices, along with the conveniently side-mounted storage board that helps keep everything organised.

ADJUSTABLE TABLE HEIGHT/HAND WINCH

The hand winch takes the effort out of adjusting the PS-2000 table with the convenience of the front-mounted safety guard.

The Korean-made 30-tonne PS-2000 Workshop Multi Press is strong, powerful, high quality and durable.
