

PREMIUM DIAGNOSTICS BY CARMAN

Carman Australia introduces the next generation of diagnostic solutions.

The new Carman Scan Auto-*i700* is a world-class diagnostic scanner with 7-inch high-resolution colour touchscreen with a Windows operating system. It is a rugged shop-tough tablet-style specialist vehicle tester that covers a vast range of vehicle systems with excellent in-depth diagnostic capabilities.

The new Auto-*i700* tool builds on 25 years of Carman Scan heritage that has continually evolved to keep up to date with the latest technology.

As one of the best Asian testers on the market it also covers a wide range of European, American and Australian vehicles, and now the Asian 24V truck applications.

The full-colour screen offers excellent graphics in all lights and the amazingly quick operating system – with a huge application list for Asian, European, American, Australian car, van and Asian truck 12V and 24V – makes the new Carman Auto-*i700* a serious player in the professional diagnostic market.

FAST, EASY, RELIABLE, SMART

Running a powerful Cortex A8 1GHz M3 120Mhz processor the Auto-*i700* is a truly impressive tool, with an optimised user-

friendly menu and time-saving features like, “Favourites” and “Recent System” for all your frequent functions and full text descriptions for DTC and live data. The vehicle software is easily kept up to date via automatic Wi-Fi updates directly from the Auto-*i* server.

Some other features include:

- Quick searching
- Screen capture and memo for report reference

- Flight record and replay in numeric or graphical form
- ECU coding and programming
- Real-time live data text capture
- Vehicle maintenance information
- Vehicle diagnostic plug locations

The built-in lithium ion polymer battery allows you to power up the tool and start the vehicle selection process prior to taking it out to the workshop or review and print data once disconnected from the vehicle.

THE PACKAGE

The Carman Auto-*i700* kit includes the basic kit plus the Australia pack containing the plastic blow-moulded carry case, power supply cables and battery charges, OBDII connector and a vast range of plugs and cables to suit older Asian and Australian vehicles, plus three years of software updates for \$5850 + GST.

The Carman Auto-*i700* is the next generation of intelligent laptop or tablet-based diagnostics. If you prefer to run your diagnostics on a laptop or tablet via Bluetooth the Carman-*i300* is the package for you. The same diagnostic system and connector pack as the *i700* but supplied with a Bluetooth VCI unit and software to load onto your choice of tablet or laptop.

If you already have an older Carman scan tool or Gscan you can use your old case and connectors and just purchase either the *i700* or the *i300* in an OBD pack.
