

INTEREQUIP A/C Refrigerant Machines

Interequip supplies quality AC refrigerant recharge recycle recover machines with 2 model lines.

The entry model ZELL AC1000 with a 10 kg internal tank, as well as the premium model AC2000 with a 20 kg internal tank are fully automatic machines for Passenger vehicles, with an inbuilt printer. The AC9000 (30kg) is designed for heavy duty truck applications. All models include

as standard a Heater for the Internal Tank to assist in the recharge mode.

Interequip also distributes the top quality 100% Italian made ECOTECHNICS AC machines. The ECK-1890 is designed for either R134A or HFO 1234YF refrigerant use, or the ECKTWIN-PRO AC machine is for both

R134a and HFO 1234YF refrigerant systems.

The ECK BUS Pro incorporates a 40kg internal tank along with a gear driver injection pump, which significantly reduces the recharge time required when servicing large A/C units installed on Buses/Coaches and trucks. The ECK BUS PRO also has as standard FLUSHING SOFTWARE for automatic flushing of series A/C systems, for use with AEK102-N7.

The ECOTECHNICS range also includes the inbuilt and updatable vehicle database on refrigerant and oil quantities for vehicles and coaches.

In addition to AC machines Interequip also supplies all work solutions including diagnostic, wheel service machine, wheel alignment, brake lathes, press, etc. from Italy, USA, Spain and Korea.

If you are in the market for any equipment, give Interequip a call on 18000EQUIP (1800037847) or visit www.interequip.com.au
