

Premium Diagnostics

Interequip is proud to introduce the new Carman scanner series to its range of diagnostic solutions.

The New Carman scan tools is built on 25 years of Carman Scan heritage that has continually evolved to keep up to date with the latest technology.

Closely working with the exclusive importer Interequip Pty Ltd, Carman software development is advancing at high speed, tailoring to Australian repair market demands. The Carman Scanner series includes many OEM functions, for example ECU re flashing, DPF Regen, key programming, BCM linking, injector coding and small quantity learning in diesel and much more.

Exceptional coverage on Asian, American, European and Australian vehicles is offered, as well as on Japanese and Korean trucks and buses.

NEW AUTO-i100

Carman's newly developed i100 makes diagnostic so affordable.

With its 7.5" touch screen display, Windows O/S, bluetooth and wireless

connection and printing, it makes advanced diagnostics simple.

NEW AUTO-i300

PC-based Auto-i300 comes with a three-years free update.

AUTO i700

Top of the range i700 handheld scanner comes with a three-year free update. Truly the very best Asian tester on the market, the Auto-i700 also covers a wide range of European, American and Australian vehicles, and with 24V vans and truck applications.

THE PACKAGE

The Carman scan tool series includes the basic kit (OBDII kit) or the Australia pack containing the plastic blow moulded carry case, power supply cables and battery charges, OBDII connector plus a vast range of plugs and cables to suit older Asian and Australian, European and American vehicles.

If you already have an older Carman

scan tool or Gscan you can use your OBD1 connectors and just purchase either the i700, i100 or the i300 in an OBDII kit.

For more information, please contact Carman Australia on (02) 9671 7811, email sales@carmanit.com.au
