

Easy diagnostics

The new Carman Scan Tools build on 25 years of Carman Scan heritage that has continually evolved to keep up to date with the latest technology.

Closely working with the exclusive importer Interequip (Carman Australia), Carman software development is advancing at high speed, tailoring to Australian repair market demands by reverse engineering to make innovative and unique software which provides every Carman owner with the fastest turnaround time that will maximise workshop productivity and increased profit margins.

An example is the ECU (Engine Control Unit) of Holden/ Opel Astra G. Carman is the first Diagnostic Scan Tool in the world that can read and recover the Original PIN code stored within the original faulty ECU.

Now the repairer can simply read and record the Original PIN code that is required during the re-coding of the immobiliser, after the ECU has been replaced. Also this feature is indispensable when new keys may require programming.

Carman also has functions needed to carry out the "Variant" coding and C.A.N coding after ECU installation along with full immobiliser capabilities, including resetting the PIN code of the immobiliser and engine computer back to a virgin state.

If you already have a couple of scanners, before spending on updating the software of your existing scan tools, why not trade-in for a brand new tool with three-year free update and 12 months warranty?

Another option is the new Carman i100, which is so affordable – only \$2990 + GST with three-year free updates.

Investing in another Carman scan tool is

Auto-i100

Auto-i700

not only making diagnosis easier and more profitable, but also benefiting the ongoing unique software development.

AUTO-i100

Carman's newly developed i100 makes diagnostic so affordable. With its 7.5" touch screen display, Windows O/S, Bluetooth and wireless connection, this model comes with the same software as i300 or i700 for 12V and 24V makes. Optional 10" and 12" tough book tablet is available. The entry model Auto-i100 comes with three-year free update.

AUTO-i300 and i700

PC-Based Auto-i300 comes with three-year free update for 12V and 24V makes. Optional tough book tablet 8", 10" or 12" is available.

The i700 is truly the very best Asian tester on the market that also covers a wide range of European, American and Australian vehicles, and with 24V vans and truck applications. The top of the range i700 handheld scanner comes with three-year free update.

THE PACKAGE

The Carman scan tool series includes the Basic kit (OBDII kit). The Australia pack

contains the plastic blow moulded carry case, power supply cables and battery charges, OBDII connector plus a vast range of plugs and cables to suit older Asian and Australian vehicles.

If you already have an older Carman scan tool or Gscan you can use your old case and connectors and just purchase either the i700, i100 or the i300 in an OBDII kit.

Interequip also supplies Autel scan tools and has a discounted package of Autel MS906 scan tool (one-year free update) with Carman i700 basic kit (three-year free update) for only \$5850 + GST or Autel MS906 plus Carman i100 basic kit for only \$4,500 + GST.

Autel MS906
