

Specifications:

- Gas sensor Type: Solid semi-conductor gas sensor
- Detecting Gas LPG, Ammonium (NH3), Methane, Natural gas, Hydrogen, Coal gas, Propane, Acetone, Gasoline, Refrigerant, Ethanol Oxide, Sulfured Hydrogen, Lacquer, Diluents, Alcohol, Gas Fuel ETC
- Quick response to combustible gas leakage
- Sensitivity: <50 ppm Methane variable
- Startup Time: < 30 sec
- Response Time: < 3 sec
- Visible Indication: Power –Green LED indication
Orange- Excessive Low power warning
- Gas concentration alarming -- ten levels gas leakage volume LED indicating combustible gas concentration,
- Audible Indication: 0.5 – 1 KHz, quicker buzzing frequency means higher gas concentration.
- Miniature size, single-handed operating design
- Power: 9V Alkaline battery
- Battery Life: More than 8 hours continuous working
- Low battery alarm indication
- Dimension: 170mm x 62mm x 26mm (Lx W x H)
- Weight: Approx. 800g
- Working Condition Tem.-20°C ~ 50°C
- Hum.<98%RH No condensation
