AUTEL MaxiBAS BT608

# INTELLIGENT BATTERY DIAGNOSTICS

Upgrade Your Maintenance

## MaxiBAS BT608

**Touchscreen Battery and Electrical System Tester**

The feature-rich BT608 battery and electrical system tester applies Adaptive Conductance, a proprietary Autel technology that identifies low capacity batteries. It displays a quick health status of the existing battery, registers a new battery and performs advanced battery and electrical system diagnostics.

### Test and Diagnose

- Diagnose low capacity batteries to reduce charge and retest
- Test the battery, starter, alternator and parasitic draw
- Read codes, erase codes, and view live data

### BMS Reset

- Battery registration for 53 vehicle makes
- Auto registration after battery replacement
- Step-by-step electrical reset instructions

### System Detection

- Features AutoVIN & VINScan for quick vehicle ID
- Identify battery parameters automatically by VIN
- Illustrated instruction for battery positioning and testing

# Touchscreen Android Tablet

- **Future Technologies**
  Easily update software via Wi-Fi to keep vehicle and battery coverage current

- **Definable Report**
  Customized customer repair reports with shop information

- **Easy Share**
  Share report via built-in thermal printer, Wi-Fi printing (via PC) or email

- **User Friendly**
  Android-based touchscreen with easy-to-use graphic interface

## Wireless Connection

Wirelessly connects tablet with VCI via Bluetooth

## Simple, Concise Test Results

5.5-inch LCD screen, displays easy-to-read reports

# Supported Battery Type

- **6- and 12-Volt Batteries: 100-3000 CCA**
  Flooded Lead-Acid  AGM Spiral & Gel  Enhanced Flooded (EFB)
- **12- and 24-Volt Electrical Systems**
- **Battery Ratings**
  CCA, CA, MCA, JIS, DIN, SAE, IEC, EN, EN2, BCI, GB

# Application

Automotive  Power Sports  Marine  Lawn & Garden
